About Aztec

We believe that Aztec has a responsibility to create a healthy, sustainable and environmentally-sound community. Aztec's experience in the abatement industry, as a company (est. 2009) and drawing on combined 75 years experience of our senior staff aligns us to be your ideal partner. Aztec delivers safe, cost effective and innovative solutions while addressing the diverse conditions that are inherent to any project.

People

Our business has been able to grow into one of Alberta's premier abatement contractors through the strength of our people. Our owners have more than 35 years of combined Hazardous Materials Removal experience, as well as other business accomplishments. The Aztec Team has successfully completed millions of dollars of work and have been able to home the industry and create innovation to better serve this sector. We believe that top to bottom our greatest strength is our people and share that vision through our quality work and retention of talented team members.

Partnerships

We are committed to creating a positive work environment that actively supports and encourages our employees, clients, partners, suppliers and all other members of our team to excel. Through the development of a strong network of suppliers, sub-contractors and strategic partnerships, we provide our clients a diverse range of specialized services. Building strong key partnerships, allows us the flexibility to take on a variety of technically complex projects. We are continuously building new partnerships and strengthening our network of suppliers and sub-contractors so that we can better serve the needs of our clients.

Health, Safety and Environment

A commitment to health, safety and the environment is at the very heart of our company. It has long been known that exposure to such airborne contaminants such as; asbestos, mould, lead, mercury and PCBs, among others, pose a serious risk to human health. We use the latest abatement technologies to handle a wide range of hazardous materials and building contaminants. Through safe and effective management, containment and removal, Aztec ensures that the risk to human health and the environment is remediated.

Innovation

Change is constant, and we realize that creativity, vision and innovation are essential in meeting the challenges of a changing world. We encourage our staff to contribute ways to increase safety, productivity and quality.
