

## Compliance

Aztec technicians are trained and follow all applicable Codes, Standards and Regulations as legislated by the Provincial and Federal Governments in all aspects of our business and on all our projects.

This includes but is not limited to:

- Aztec HSE Protocols and Standards
- Occupational Health and Safety Legislation
- Asbestos Abatement Manual
- Workers Compensation Board Legislation
- Provincial Environment, Waste Control Regulations (WCR)
- Best Practices – Mold at the Work Site
- Provincial Labour Standards
- Environmental Protection and Enhancement Act

Our continual investment in industry leading certifications and qualifications ensure that all our business processes are executed with a focus on quality and safety.

## Bonding and Insurance

Aztec Group is fully licensed, bonded and insured to protect the success of our client’s projects.

We carry a comprehensive package of general liability and fleet insurance with special coverage for environmental pollution. Additional coverage for specific projects is also available, including increased limits and other coverages as required by our clients.

We also hold an up-to-date registration with workers’ compensation programs in each of the provinces in which we operate. As a result of our extensive health & safety program, we have consistently received preferred standing for maintaining an excellent track record of on-the-job safety.

Our partner Bridge Capital is a source of funding for projects to further enhance our ability to perform on projects. Through traditional bank financing, funding can be limited to the ebb and flow of cash on hand and limited, non-contractor friendly lines of credit. With Bridge Capital we now have the ability to use traditional bank financing as well as project-to-project pre-financing for jobs to ensure suppliers, staff and subtrades get the best terms for our projects – in turn allowing us to attract and keep the best of the best.
